

RANSOHOFF

CONTRACT FABRICATION

Go to the pros for all your sheet metal fabrication.

With resources stretched thin and more pressure than ever on delivery schedules and the bottom line, an increasing number of manufacturers are today outsourcing their sheet metal fabrication operations to an expert partner. For many, it's an ideal way to reduce production bottlenecks and minimize investment and risk.

Outsource to Ransohoff CONTRACT FABRICATION.

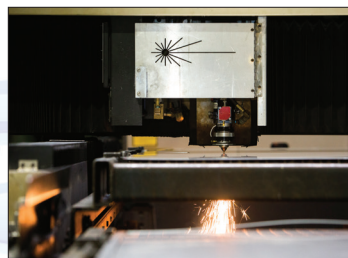

We've been in the business of sheet metal fabrication for 100 years – for the construction of our own world-renowned parts cleaning machines as well as on a contract basis for other manufacturers seeking the same high levels of quality that we demand in our own products. Since sheet metal fabrication is such an integral part of the design and functionality of our own product line, we've put into place a modern, vertically integrated, and highly productive fabrication line that can deliver significantly more added value than you might find through your typical contract metal fabricator.

Most importantly, your Ransohoff Project Management team will work with you from Day One to develop a plan to meet your objectives, whether to reduce cost, add value and/or streamline delivery.

CONTRACT FABRICATION

Our CONTRACT FABRICATION Capabilities

Fabrication	10 ft. Brake, Up to 230 Tons Forming Laser Cutting and Etching Punch Press Up to 80 Tons Shearing Up to 10 ft. Rolling Notching: Up to 14 Gauge
Welding	MIG, TIG, Arc and Stick
Automation	CNC & Manual
Materials	Stainless: 201, 304, 316 Carbon Steel: 1018, 1020, A-36, 1215 Aluminum
Raw Material Forms	Sheet
Gauge Size/Thickness	.50 in. Max. Carbon Steel .25 in. Max. Stainless Steel and Aluminum
Max. Sheet Width	5 ft.
Max. Sheet Length	10 ft.
Production Volumes	Production and Batch Runs
Deliveries	2 to 3 Weeks (Rush Services Available)
Industries Served	Ag., Auto/Truck/Transportation, Chemical, Machine Tool, Medical, Military, Oil Patch, Packaging, Pharmaceutical
Applications	Fabrications, Weldments, Fittings, Standoffs, Flanges, Gussets
Engineering	Project Management and Mechanical and Electrical Design Capabilities
